Abstract - Education is the step on which human becomes civilized and cultured. But are there all the qualities in the present education that humans could reach the climax. In India and the rest of the world, doubts are being raised about the basic assumptions of the educational structure today is. It is increasingly felt at all levels that the prevailing educational formats have failed. Human life scientist Life has become so complicated that there is no meaningful relationship between man and social life.

The environmental crisis and the ever-increasing poverty, hunger, violence, and unemployment are forcing a human being to interview the peace of life, which is the reality of human life. At such a time, the basic concepts of education a thorough and innovative approach is necessary. In the present time, many changes are necessary for the field of education. In our India Year, I have had many educationists, one of whom is Dr. A. P. J. Abdul Kalama. Their education is deeply connected to the system.

New Education Policy-2020

- Educational ideas of Dr. A.P.J. Abdul Kalam.

Educational structure

- Environmental crisis

Innovative approach

- Indian academic community

I. PREFACE

Change is the law of the world. Just as there was a Gurukul system in ancient times, the place of Gurukul after the period Different types of schools, madrasas, educational institutions, etc. took. In this way, our education system has over time Changes are moving along. But some such changes should be applied in the current education system in reality. Changes or changes in our new education policy have been

or are going to take place. The idea of academic thoughts of Kalama Sahib Shows Though the views given by our educationists had already been told years ago, the same is applicable in today's education policy. This only so we have a new education policy, which is being called the congregation of ancient and new.

Their need is being felt. The current government is taking steps towards such changes through the new education policy. By the way, the definition of education is broad but

if we say in narrow form and simple language, then from birth to death and swing from the grave to the person, the person always keeps learning. A human being is a lifelong learner and should also remain. We not only have they learned something from their elders, many of the children who have been educated many times also learn a lot from us. Dr. Abdul Kalama, it was said that for education, it is not only necessary to have a teacher and a learner, but a course is also required. According to this, the interaction between these three is called education. Because the utility of education is for both humans and society have been taken Ideas on ancient and new education

II. THE INDIAN ACADEMIC COMMUNITY AND EDUCATION.

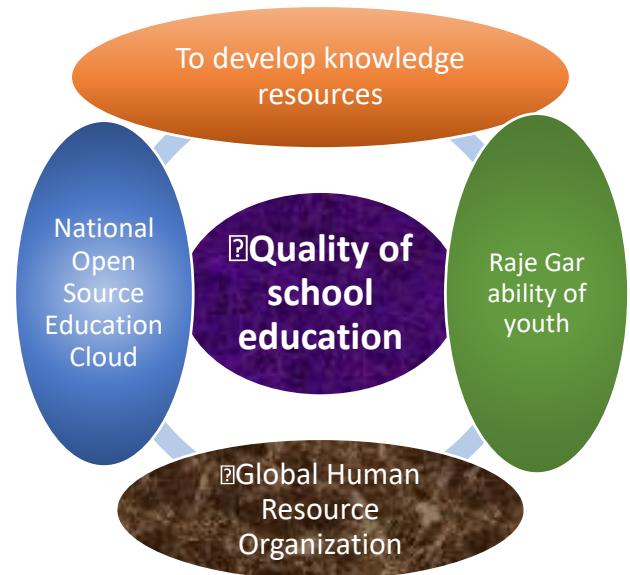

Indian civilization was the first civilization to build a center dedicated to education about 2700 years ago. Taxila which today Similar to the modern college town, is where Kantilla composed his famous work Arthashastra, Charka Studied Ayurveda and Panini produced Sanskrit grammar. About 1500 years ago, in the 5th century, the Indians Nalanda established a wide university which, with its state-of-the-art vision and education, resulted in many foreigners the scholars were also attracted. The decline of the Indian academic community and education from the demolition of Nalanda since 1200 AD was growing rapidly during the British Raj. Of our ancient teachers nearby was the storehouse of esoteric and occult theories.

III. DR. KALAMA SAHIB BELIEVED THAT THE ISSUE OF QUALITY OF THE INDIAN EDUCATION SYSTEM.

He used to solve every problem of the student in a simple way. He used to guide them in such a way that student knowledge and was filled with energy. Dr. Kalama also said that present-day India is a global standard program and the creation of the world's leading research to revise their teachers, their education, and education system, for which the people of the country are eligible which Provides and removes disappointment. Kalama sahib believed that the issue of the quality of the Indian education system for us is important. A well-balanced education system creates trained youth. Kalama sahib believed that sharing knowledge. The place of teachers in the country is the best, so every teacher should go ahead and do this work with honesty and dedication the wanted.

Emphasizing the structure of the new education system Kalama wanted to focus on the following points for the quality of education Let-

- Quality of school education
- To develop knowledge resources
- Raja Gar ability of youth
- Global Human Resource Organization
- National Open Source Education Cloud

Emphasizing the structure of the new education system

IV. KALAM SAHIB'S ATTITUDE TOWARDS STUDENTS-

Dr. Kalama always used to look forward to meeting the students, probably he would get a pleasant feeling from it. Kalama Sahib wanted to meet the children and know about their dreams and they used to talk about their dreams. They used to say that the students there are a lot of wealth, so every child born in India should be allowed to grow and develop. Students developed He always repeated this poem to encourage the nation - "When you want to touch the sky Do not think about who you are the desire is in the heart It will be done completely Through poetry, he wanted to convey the message that if a young student does all the work whether it is at primary level, secondary level Or if the trainee is of a high level if he sets great goals in his mind, then he must surely meet the goal of the developed nation. Will get it.

Dr. According to Kalama, every student should plan to work and plan to work, and work should be done systematically. They believed that we are emphasizing only at the beginning and end of the work but the student must try to keep the work going so that we are always on the path of progress.

Dr. Kalama believed that these four basic initiatives are necessary for successful results in student life.

- Goal Setting
- Positive Thinking
- Clear imagination in mind
- . Confidence

Dr. Kalama students set their goals as a student and focus their attention on the obstacles calling to cooperate in achieving the concept of India by conquering and earning excellence in it. Yes. He believed that every student's values should be imbibed in his life. Dr. Equality in educational ideas and new education policy of Kalama There are many academics in our country including Dr. Kalama's place is important. He had a 21st-century golden dream in India More about this source text required for additional translation

information had already preserved it. Mr. Kalama believed that three aspects are important for education - teacher, learner, and Syllabus.

V. DR. KALAMA BELIEVED THAT TEACHER HAS AN IMPORTANT PLACE IN THE SOCIETY.

Mr. Kalama also believed that the teacher should be multi-faceted. In the teacher, they should have all the qualities that they expect from their students. Because the student also learns only when he is his teacher or Shows those qualities in his family. About student life, he said that every Student should think something every moment and complete it as well as try to bring newness in it so that the society could get something new. According to Kalama sahib, to increase the spiritual knowledge of different religions, the thoughts of saints and sages Along with being included, they wanted the curriculum to be creative, practical, and technology-based. Dr. Kalama believed that teacher has an important place in the society.

VI. ACCORDING TO DR. KALAMA AND UNDER THE NEW EDUCATION POLICY

According to the new education policy 2020, such a curriculum should be developed for the overall development of the children, they should be taught in the mother tongue, and thus Points of the region have been added. It has been recommended to study with such methods that the child's physical and physical.

To achieve mental development. Each subject should be taught, whereby the students can choose their field of work according to their interest. Could. Due to the limited subject, the student has to be forced to study and he cannot do anything according to his interest. Therefore, in the field of encouraging students, new steps need to be taken in the field so that children can get their future life. I could progress. Meaningful in the direction of conservation, development, and the making of life of different languages through new education policy an attempt has been made. Different types of facilities will be provided for future teachers under the new education policy. Of education for trainees, all methods will also be included. According to Dr. Kalama and under the new education policy, the efforts to be taken for future teachers Mr. Kalama believed that the teacher should have the quality of multi-level teaching. They think that education should be Rayon Mukherjee.

Our teachers will be able to impart effective education only when they have access to an abundant amount of resources. Dr. Kalama Emphasized the method of learning, this quality is included in our new education policy. Children, sports, poetry, etc.

He insisted on giving numerical knowledge through the medium. He believed that every child and teacher should also be evaluated. Different types of technology should be linked to education so that every teacher in our field gets all

those qualities and when if teachers try to teach children through various methods, then there will be a tendency of interestingness in children.

VII. EDUCATION SHOULD BE EMPLOYMENT-ORIENTED

Dr. Kalama Sahib believed that the education of our colleges, training institutes should not be limited to distributing degrees only, but Education should be employment-oriented. Future teachers should have a special type of expertise that is related to employment. Our education system is also being reformed from time to time and the new education policy is also an example of this tradition. India

The majority of the population resides in the villages and, ironically, lakhs of students cannot reach schools, colleges, etc. Yes. Dr. According to Kalama, correspondence education is the only way through which good education can be provided. Is. Along with this, linking schools and colleges with e-education is the need of the hour. Mr. Kalama It was believed that in the 21st century, the education model is the need of the hour by which students should ensure that as they grow up, they will be in the progress of the nation. Support and the entire education system should be able to arouse potential in students.

Mr. Kalama has given the following five initiatives which apply to future teachers for nation-building -

- ❖ Research and Curiosity
- ❖ Creativity and innovation
- ❖ Ability to use technology
- ❖ Entrepreneurship
- ❖ Ethical Leadership

Dr. Kalama has told many dimensions of future teachers or teachers who can be taught, which we have in essence in the following points.

Can be divided into -

- Education should be given as it is necessary every day.
- Education should also be given on serious subjects.
- Along with book education, useful education should be given for life.
- Concentration must be characterized.
- There should be complete behavior.
- Emphasis on learning and learning by doing.
- The self-esteem of the teacher should be high and children should also have the quality to be ideal.
- To build the character of the students.
- Educate children according to their intelligence, level of understanding, and need.
- Students should understand well and listen to their problems and solve them or even solve them

Help them.

- Must also have the qualities of an effective personality and creativity.
- Familiar with the latest technical knowledge. Do not think of any task. Must be inquisitive.
- Not only impart bookish knowledge, but every student should also teach theoretical and practical things.

All these things are related to our new education policy, so we can say that these things have been told in our new education policy. The visionary of them all is Dr. Kalama had already told that he was a scientist as well as a teacher. India Rattan Dr. A.P.J. Abdul Kalama was the master of immense jeevisha and eccentric vision. He has given society his traditional ideas Gave a new direction, inspired every Indian, especially the youth and students. Dr. Kalama's teacher on sweet relation between students Used to emphasize the most because a teacher understands the psychological thoughts of the child properly. Of a teacher

VIII. THE STUDENT IS THE CREATOR OF THE FUTURE NATION

The student in the eye is the creator of the future nation. When Kalama Sahib met the students, they imagined the mind of the children, they tried to know their dreams and also used to solve their problems. Dr. The country belongs to the Kalama student class they did not make us feel important for being important, but they also used to inspire the child mind students that an educated and developed nation can be created by the student class. He believed that whatever was done by the younger class let it be done from their heart and be a manifestation of the soul. This requires that the elite Have dreams and fulfill them because there is no strength on earth other than being committed to dreams.

Unless the teachers and youths of our world will not dream of a developed nation and will not be motivated to fulfill it then it is not possible to achieve this goal. About the dream of dreaming young people and future teachers, he said that - It is not a shame to touch the stars, but it is a shame not to dream of touching the stars. This Type Dr. as a teacher Kalama always encouraged the students.

IX. THAT A POSITIVE INITIATIVE IS BEING TAKEN IN THIS DIRECTION THROUGH THE NEW EDUCATION POLICY

Dr. According to Kalama, in the 21st century, we will have to redefine education, school, syllabus, teacher, and student. That a positive initiative is being taken in this direction through the new education policy. We ensure this through education It would be that we educate the students for success. Instead of teaching us the teaching process directly, emphasis on teaching has to give. Dr. Kalama saw life as a way of learning. Kalama sahib believed that acquiring knowledge was a slow process. According to Kalama, the meaning of education is - special characteristics of learning and reading, some less but very important decisions.

Ability, discretion, and rationality. Above all, education makes sense of culture from one generation to the next. Education The cultural heritage of the system, its resources, its condition, and its changes and degradation should be assessed. Latest Important role in harmonizing knowledge skills and values according to Indian policy of education policy and changing times Will pay Major problems related to education in current education are lack of teachers, lack of schools, education reform programs Failure to succeed, lack of quality in rural education, accountability and performance formula of professors in higher education Not determined and the inclusion of Indian universities in the list of top 200 universities of the world

X. CONCLUSION

All the reason is that they show the scope of a big change in the field of education and the new education policy is commendable in this direction Step. Proper implementation of this education policy will prove to be a milestone in the world becoming the major superpower in the 21st century. And new education policy proved useful in becoming a world guru by providing a new direction to India's ancient knowledge and culture will be.
